03/2020 - 04/2022

67%

Courses

- Arts

### **Matriculation**

#### DVHS

2018

80%

## PERSONAL PROJECTS

### **CollabSpark (03/2025 - 03/2025)**

CollabSpark is a collaborative idea-sharing platform where your thoughts can turn into real-world projects. Whether it's a startup concept, a creative idea, or a social initiative — you post it, and others with shared interest can join you to build it together. react,node.js,MongoDB,express.js,socket.js,bcrypt,jsonwebtoken,webrtc, are the technologies used.

### **CONSULT WEEBSITE:-**

This is agency website I am use next js and socket.io for real time connection  
Git link:<https://github.com/bidut04/>  
Link: <https://consult-two-wheat.vercel.app/>

### **Food Delivery Platform – Full Stack Application**

Tech Stack: Next.js, TypeScript, PostgreSQL, Socket.IO, Redis, TanStack Query, NextAuth, Monorepo Architecture

Developed a scalable food delivery web application using Next.js and TypeScript, structured as a monorepo with three separate applications:

- User App – for browsing restaurants, placing orders, and tracking orders
- Restaurant Owner App – for managing menus, orders, and restaurant operations
- Super Admin App – for platform administration and restaurant verification

Implemented a restaurant onboarding and approval system, where the Super Admin reviews and approves restaurant owner applications before allowing account activation.
